SUMMARY

I'm a web developer who knows how to build websites and apps. I'm good with HTML, CSS, JavaScript, Java, JSTL, JSP, React, and MySQL. I enjoy making websites that are easy to use and look great. I know how to work on both the front and back ends of websites. I'm always learning and looking for new ways to improve.

PROJECTS

Inventory Management

Admin side

📅 2024 - Present   📍 Surat

This is my final year project "Developed an inventory management website to track stock levels, orders, and supplier details efficiently. Designed user-friendly interfaces for easy navigation and data entry. Improved inventory accuracy and operational efficiency through streamlined management."

- I developed a dynamic website using a combination of technologies to create an engaging user experience. This project showcases my skills in web development, database management, and server-side scripting.
- Our **Client and Product Management System** is designed specifically for small shopkeepers and their employees. It streamlines essential tasks related to client details and product inventory. Whether you run a neighborhood grocery store, a boutique, or any retail business, this system simplifies daily operations.
- He/she can eaily create bill of sale and purchase and maintain the track of sale, purchase, expences, and profile.
